MONTINY HOME

Montiny Home; offers comfortable and smart living spaces that support natural life with mobile home and cabin designs.

According to the motto of living commune with nature, which is the starting point of this movement, it builds small houses that will meet all the needs in small spaces in the most comfortable way, with materials compatible with nature.

The basic element in their design is to customize the most natural and comfortable spaces for their users.

MAXI

Maxi, is a Montiny model in which living and sleeping areas can be solved together or separately upon demand, gathered under an asymmetrical roof, in which the use of wood is at the forefront in all its structural elements.

This model can be produced in 6 m, 7 m, 8 m lengths upon request and its entrance is in long façade. The interior layout of the model is variable depending on the desired length, and in the main model, the kitchen and living area are located in the middle, the wet area and the bedroom are placed on narrow facades. The large glass opening in the bedroom offers us the opportunity to watch nature, and the skylight on the mezzanine floor offers us the opportunity to watch the sky.

LE-GO

Le-go is a Montiny model gathered under a one-way sloping roof that can allow wider usage areas by combining many tiny house modules in line with special demand. In this model, the entrance is made from a narrow façade, and it can be produced by combining two modules with special connection details in the desired size. With the combination of two modules, 2+1 apartment with living room, bedroom, bathroom, kitchen and mezzanine bedroom, 3+1 apartment with living room, two bedrooms, bathroom, kitchen and mezzanine bedroom with the combination of three modules is being created. It is possible to enlarge the interior layout of these flat sizes by adding modules depending on the desired length and terrain.
